

EVV ANNOUNCEMENT FOR HOME HEALTH PROVIDERS

The Wyoming Department of Health (WDH) is pleased to announce its continued partnership with CareBridge as their Data Aggregation solution, ensuring WDH and the Home Health provider community complies with the *21st Century Cures Act*. CareBridge's Data Aggregation solution will focus on collecting and reporting EVV compliant data for all required Home Health services. Through this partnership, Home Health providers will be able to leverage, at no cost, CareBridge's EVV solution to capture electronically validated visits.

The WDH expects Home Health providers to begin using EVV to submit electronically validated visits and generate claims no later than January 1, 2024. Home Health providers are strongly encouraged to begin using EVV as soon as it's available on November 1, 2023 to allow time to prepare for this change. Over the next few weeks, CareBridge will be supporting WDH in the efforts to prepare providers to successfully use EVV beginning November 1, 2023.

Providers who perform any of the following Home Health services will be required to use EVV:

Revenue Code	Revenue Code Description
0421	Physical Therapy
0431	Occupational Therapy
0441	Speech Therapy
0550	Skilled Nursing - General Classification
0551	Skilled Nursing
0561	Medical Social Worker
0570	Home Health Aide - General Class
0571	Home Health Aide
0579	Personal Care Attendant

What's Next?

WDH expects all contracted Home Health provider agencies to either utilize the CareBridge EVV solution at no cost to providers, or to successfully integrate your chosen EVV solution with CareBridge. The requirements for a compliant EVV system are outlined in the *21st Century Cures Act*, a federal law that requires all states to implement EVV.

HOME HEALTH PROVIDERS CHECKLIST:

Home Health providers must take *immediate* action, including communicating with their chosen EVV vendor, confirming and identifying integration dependencies, and completing training. Please be prepared to complete the following steps:

- EVV Provider Setup and Vendor Selection:
 - All providers must complete the [EVV Provider Set Up & Access Form](#) to inform CareBridge of what EVV Vendor your agency plans to use, as well as to identify the appropriate billing contact for your office.

- Agency Integration: ***This step is not required if you are using CareBridge as your EVV solution.***

- If your agency will be using an EVV vendor *other* than CareBridge, it's critical to share the following link with your EVV vendor as soon as possible: [Third-Party EVV Vendor Intake Form](#)

Important: It can take up to eight weeks to complete the integration process with CareBridge, so it's important to have your vendor start this process immediately.

Training for Providers:

- Registration for training will be available soon. You can access this calendar and other training resources at the following link: <https://www.carebridgehealth.com/trainingwyevv>
 - You can also view recorded training videos and other materials in CareBridge's online resource library. The online library can be accessed 24/7 at the following link: <http://resourcelibrary.carebridgehealth.com/wyevv>

All provider agencies **must**:

- 1) **Promptly read and act on any communication from WDH pertaining to EVV.**
- 2) **Begin using EVV as soon as possible:**
 - ✓ **CareBridge Users:** Register for and attend CareBridge-hosted training sessions or use the CareBridge online resource library to learn how to use EVV.
 - ✓ **Providers using other EVV Vendors:** Communicate with your EVV vendor the need for them to complete the CareBridge [Third-Party EVV Vendor Intake Form](#) to begin the integration process with CareBridge and use the CareBridge online resource library to learn more about the integration process.
- 3) **Train your caregivers on how to use EVV to document visits.**

These three steps are the keys to your agency having success using EVV.

Use EVV to Avoid Payment Delays

We encourage you to begin using EVV as soon as it's available on November 1, 2023 to allow time to prepare for this change. Over the next few months, CareBridge will be supporting WDH in the efforts to prepare providers to successfully use EVV.

You can avoid payment delays by using CareBridge EVV early, or by confirming your approved EVV vendor has completed the integration process with CareBridge and is ready to submit EVV visits to the CareBridge EVV solution.

Want More Information?

Provider agencies must begin utilizing EVV to document visits for required services by January 1, 2024. This will require all claims with dates of service on or after January 1, 2024 to be generated through the CareBridge EVV solution, or they will be denied, causing payments to be delayed. You can prevent this by attending training or confirming your EVV vendor has completed the integration process with CareBridge and that all the required steps have been taken.
